

# STRAIGHT WIRE

## SYMPHONY II

ANALOG AUDIO INTERCONNECTS

### OFHC Copper Conductors

for accurate, uncolored presentation

### Foam Hybrid TPR Insulation

for enhanced bass performance

### Dual Copper Braid & Foil Shields

minimize external noise

### Star-Quad Design

neutral, full balanced capability

**Symphony II** enhances the presentation capabilities of better electronics. Its silky midrange and rich, extended bass retrieval abilities convey all the natural texture of vocals and instruments. Special Foam TPR insulation around OFHC copper conductor groups in a balanced Star Quad design. Great for mid level integrated amps, components with discreet analog audio circuitry, better subwoofers and better digital equipment!

**XLR** (balanced termination ) and **Telescopic** termination (tie the shield to ground at one end) are available along with standard RCA termination.

Charcoal Gray jacket ; 7mm (.275") diameter

**LEVEL 2 - ENHANCED**

SIGNIFICANT ADVANCEMENT BEYOND STANDARD CABLES
