

STRAIGHT WIRE

CHORUS II

ANALOG AUDIO INTERCONNECTS

OFHC Copper Conductors

for accurate, uncolored presentation

Sintered Foam Teflon Insulation

minimizes music energy storage

High Coverage OFHC Braid Shield

for quiet background

Symmetrical Coax Design

for better bass & dialogue intelligibility

Chorus II interconnect reveals the details in your favorite movies and music to improve your home entertainment experience. Sintered Foam Teflon insulation and OFHC conductors produce great sonic realism and depth. Chorus II utilizes an advanced symmetrical coaxial design to deliver an uncompromised signal including pinpoint details and tight, accurate bass. It will capture and release all the subtleties that you enjoy hearing.
