

STRAIGHT WIRE

MUSICABLE II

SPEAKER CABLE

Oxygen Free Copper Conductors
for accurate signal transfer

Advanced Polypropylene Insulation
preserves open soundstage

Quad Twist Design

MUSICABLE II Speaker Cable is for enthusiasts who demand more than basic PVC insulated standard speaker cables. Composed of 4 conductors of OFC (Oxygen Free Copper) at 14 AWG (American Wire Gauge), this cable can deliver all the power and signal quality from today's HD AV Receivers.

Musicable utilizes Polypropylene insulation with a low dielectric constant and a helical twist design to minimize electro-magnetic cancellations found in standard twin lead designs. The cable is jacketed with a Navy Blue matte finish jacket that is flexible and durable.

ESSENTIAL UPGRADE OVER MANUFACTURER SUPPLIED CABLES
