

# STRAIGHT WIRE

## EXPRESSIVO

SPEAKER CABLE

**Air Suspension Design**  
Unrestricted Holographic Imaging

**OFHC CCT Conductors**  
For accuracy and dynamics

**Dual Poly Foam Insulation**  
Preserves musical nuances and low level details

**EXPRESSIVO**, a unique, NEW premium bi-wireable speaker cable. It incorporates Compressed Conductor Technology (CCT) with 4 positive "air suspended" conductors at 15AWG of OFHC Copper (CDA 101) Multiple low dielectric insulations are employed to optimize mechanical and electrical performance. This low resistance speaker cable utilizes two opposing spiral shields for the negative conductor path(s) and familiar Straight Wire anti-static micro-fiber braid. The cable is custom jacketed with a durable mesh (various color options at no up-charge) rather than the Straight Wire traditional clear jacket. This is to preserve micro-details of the Expressivo unique "air suspension" design.

Expressivo Speaker Cable combines CCT with a modified Symmetrical Helix design similar to the highly acclaimed Virtuoso H speaker cable produced by Straight Wire. CCT designs combine the best attributes of solid-core and stranded conductor technology.

**LEVEL 3 - ADVANCED**

INNOVATIVE TECHNOLOGY, HIGH RESOLUTION CABLES
