

STRAIGHT WIRE

OCTAVE II

SPEAKER CABLE

Compressed OFHC Conductors
For accuracy and consistency

Foam Polypropylene Insulation
For precise placement of musical details

Helix Design
Produces authentic soundstage

Octave II features eight CCT (Compressed Conductor Technology) OFHC copper conductor groupings with advanced foam polypropylene insulation for a significant advance in detail and precision. Compressing each conductor group achieves the best electrical and mechanical attributes of both solid core and stranded technologies. Linearity and consistency with focus, depth and musicality – Octave II is great choice for serious audio enthusiasts and has low enough resistance for long run applications.

IBW (internally bi-wireable cable) Matte Beige jacket ; 14.4mm (.570") diameter

LEVEL 2 - ENHANCED

SIGNIFICANT ADVANCEMENT BEYOND STANDARD CABLES
